

Park circulation & features

Key :

-  Entrance to the park
-  Pathway with level or easy gradient (ideally max 1:20)
-  Steep pathway
-  New building or structure
-  Sports activities

Sketch view from looking north-west

Site location

GARAGES to PERGOLA

These might be removed completely and the land they sit on be claimed by the Park, and incorporated into a perimeter walkway which, being on higher ground, will have views over the courts and the park

GAZEBO

The current overgrown area can be reclaimed as usable amenity space, and with access off Hillside Road could site a new day-time facility

GARAGES to PERGOLA

These might be removed completely and the land they sit on be claimed by the Park, and incorporated into a perimeter walkway which, being on higher ground, will have views over the courts and the park

GATE 2

re-landscaped with easier slopes and steps, new planting, and more open views into the park

HERB GARDEN

With the toilet block removed the now open ground has potential for a community project garden

GATE 1

Made more prominent with a paved set-back with seat, signage & lighting...

DOG AREA

Not forgetting the dog bins, but somewhere for dogs to chase around without being a nuisance...

KICK-ABOUT AREA

Level grass area for informal sports, eg volleyball, mini-rounders & cricket, etc; the walkway may have tiered steps down to grass level...

PARTERRE GARDEN

The levelled area currently housing the One O'clock Club could be used for a small formal garden with seating and viewing spots...

BOULEVARD & TERRACES

Steeply sloping so there are alternative routes across the park; suggested here are separate level terraces off to the south with seating & picnic areas, overlooking the sports courts

PLAYGROUND

The new play space has been in use for over a year
